

# Summer

## Homework

Name: \_\_\_\_\_

**Primary 4**

Dear Parents,

Summer break is here!!! It has been such a joy to watch your children grow and learn so much. We are very proud of all the progress each child has made. Your support and efforts at home have been a major reason for your child's successes every time. Each of you is to be commended for your efforts.

In order to make sure that your child keeps the "brain juices" flowing over the summer break, we have put together a packet that reviews great materials we have learned till now and an introduction of what we will learn in future. Completing the assigned pages each week would be very beneficial as it would help ensure retention of the materials learned. Moreover, completion of this packet will get us off on the right foot when your child returns to school.

Once again, thank you for all your support! We look forward to seeing all of your children's bright and shining faces soon. Enjoy the summer!

Regards,

Management

**Be Creative, Be Kind, Be Happy, Be Safe & Be You!**

PARAGRAPH #01

**SNOW CAVES**

People are not made to live in very cold weather. We do not have fur to keep us warm! We must make our clothes and shelter. In winter, you must be careful. If you get stuck outside for a long time on a cold day, you may freeze. So, what can you do to stay warm? First, find a big pile of snow. Then, dig a cave. Make the cave big enough to hold air for you to breathe. Before you climb inside, brush any snow off your clothes. The heat from your body will be trapped inside the cave. This is good! But if your clothes are snowy, the snow will melt. This is bad. Wet clothes will pull the heat right out of your body. Climb into your cave. Next, fill up the door hole with snow. This way the heat will not get out. If you can, share your cave with a friend. Two people make more heat than one person can.

PARAGRAPH #02

**MAMA'S MAGIC TRICK**

Rosa, Anita, and Felipe came to the kitchen for dinner.

Rosa said, "I do not like salad."

"I know that," said Mama, "but salad is what we are having."

Then Mama put some chicken on each plate.

"I don't like chicken," said Felipe.

Last, Mama gave each of them some special rice.

"That smells so good!" said Felipe.

"I want plain rice," said Anita.

Finally, Mama said, "I cook and cook, but I can never make something that all you children like."

"That would take magic," said Papa.

Mama laughed. Then she left the room. When she came back, she was wearing a pair of wings from the dress-up box. She was carrying a wand.

She pointed the wand at all three children. "Love the food!"

she laughed. "Love it all!"

Rosa smiled and took a bite of salad. Anita grinned and ate some rice. Felipe even tried some chicken. Papa said Mama's magic trick worked!

PARAGRAPH #03  
**WHAT IS A WHALE?**

Many people think that a whale is a kind of fish. A whale is not a fish at all. But whales and fish are much alike. Like fish, whales spend their lives in the water. Whales and fish both have fins. They use the fins to swim. Whales often stay together in groups. These groups are called pods. Many kinds of fish also stay together in groups. A group of fish is called a school. Whales are different from fish in an important way. A fish can breathe underwater. A whale cannot. A whale must come to the top of the water to take a breath. It takes in air through a hole on its back. A whale can hold its breath under the water for a long time. But after a while, it must come back up for more air. If a whale is not a fish, what is it? A whale is a mammal. There are many kinds of mammals. Dogs, cats, and horses are mammals, too. Most mammals live only on land. Some, such as beavers, live part of the time on land and part of the time in water. Besides the whale, just one other mammal—the sea cow—lives only in water.

Did you know that you are a mammal, too? You are more like a whale than you might think. You have hair on your body. So does a whale. Your heart has four parts. So does a whales. Your body always stays about the same temperature. A whale's body does, too. Of course, you are different from a whale in many ways. You don't have fins or a tail. You spend almost all your time on land. But here's something to think about the next time you go swimming. When you dive under the water and come back up for air, you are acting just like a whale!
